

US Consumer Product Safety Commission Log of Meeting

Subject: CSA Smart Enabled Gas Ranges WG Meeting

Date: May 27, 2021

Location: Teleconference

Prepared By: Chen-hsiang Su (csu@cpsc.gov, 301-987-2529), May 27, 2021

CPSC Attendees: Scott Ayers and Chen-hsiang Su

Non-CPSC Attendees: Contact CSA for a list of attendees

Summary of Meeting:

Contact CSA for more details on this meeting.

There was a CSA Smart Enabled Gas Ranges work group meeting.

The work group reviewed and discussed proposed items, including top level system function requirements, definitions for closed loop cooking and remote closed loop cooking, modification to Annex H language, closed loop cooking cooktop operation requirements, and temperature limiting function test. During the meeting, CPSC staff mentioned that there is no distance limitation between the external device for remote closed loop cooking and the appliance in the proposed requirements.

A doodle poll with three date options (June 8, June 9, and June 10) will be sent to the work group to determine the next meeting date.
